MANU ♦ TORRES
EYEWEAR

Inspired leather eyewear from artisan and sculptor Manu Torres. Born from a desire to create unique eyewear from this timeless material.

Grandson of a stonemason, Manu abandoned his career in Business Administration in order to become a stone sculptor. In Santiago de Compostela, working alongside local leather artisans and artists with decades of experience, he honed and perfected his skills and in 2014 he created his first leather spectacles.

Conceived and refined in Santiago de Compostela this eyewear has a rich artisanal heritage. This is a city where artisans have been working silver, stone and leather for hundreds of years.

Made from premium quality organically tanned natural leather from the last surviving traditional tanneries in the Iberian Peninsula.

Our unique and patented manufacturing process is a blend of traditional artisanal skills, digital design and modern precision cutting techniques ensuring an exceptional finish.

At our atelier we create each pair of spectacles by hand, one by one. This allows wearers to customise their eyewear, first selecting the design and then choosing the leather colour combination.

The beauty of leather is that it not only has a wonderful tactile quality when brand new but, like all leather goods, with time it develops character and interest.

The hand crafting techniques used to work the leather have changed little over the centuries making each piece of Manu Torres eyewear truly timeless.
